dlasala_230000000999@uic.edu.ph | github.com/Lasala04

Profile

Third-year BSIT student at the University of the Immaculate Conception specializing in Healthcare Technologies. Co-founder and IP Liaison of BurNoy — a cloud-based OJT monitoring platform. Experienced in full-stack mobile and web development with a strong interest in building scalable, impact-driven technology solutions for education and healthcare sectors.

Education

University of the Immaculate Conception — Davao City, Philippines

Bachelor of Science in Information Technology | 2023 – Present | 3rd Year

Specialization: Healthcare Technologies

- Relevant coursework: Machine Learning, Server Administration, Technopreneurship, Healthcare Technologies, Systems Design
- 3rd Honors, BSIT-3B Honor Roll — 1st Semester

Entrepreneurial Venture

University of the Immaculate Conception — Davao City, Philippines

BurNoy OJT Cloud Platform — Co-Founder & IP Liaison | 2025 – Present | Group 1A

Technopreneurship 1

- Architected a cloud-based OJT monitoring and journaling system scoped for higher education institutions in Davao Region (Region XI)
- Led full-stack development using modern web technologies with Firebase/Supabase cloud backend
- Drafted utility model patent application for core platform IP
- Developed and presented a comprehensive pitch deck to academic and industry evaluators
- Team: Pyae Sone Char Than Aung (CEO), Ronald P. Maslog (CTO), Frederick Joshua P. Paclibar (CMO)

Notable Projects

EcoByte — E-Waste Marketplace Mobile App | 2025 *Flutter / Firebase / Cloudinary / OpenStreetMap*

- Built a sustainability-focused mobile marketplace for buying and selling e-waste electronics
- Implemented seller/buyer roles, image upload, real-time messaging, Google OAuth, and map integration
- Designed with dark/light mode toggle, animated screens, seller badges, and rating system

MediRemind — Cloud Medication Manager | 2025 *HTML / Tailwind CSS / Vanilla JS / Supabase*

- Delivered a full-featured medication management web app with reminder system and analytics dashboard
- Completed four core feature priorities: Medication Management, Reminder System, Reports & Analytics, and User Features

ML Algorithm Interactive Website | 2024 *React / Next.js / Python*

- Developed an interactive site showcasing six ML models (Linear Regression, Decision Tree, KNN, Neural Network, and others)
- Deployed on Ubuntu server inside Oracle VirtualBox for academic submission

Technical Skills

Mobile Development	Flutter, Dart
Web Development	Next.js, React, HTML, Tailwind CSS, JavaScript
Backend & Cloud	Firebase, Supabase, Cloudinary, Python
Tools & Platforms	Android Studio, VS Code, Ubuntu/Linux, Git, Oracle VirtualBox
Other	Machine Learning, ERD/Schema Design, REST APIs, OpenStreetMap/Leaflet

Leadership & Affiliations

Event Lead, Google Developer Groups on Campus — UIC Chapter | 2025 – Present

- Leads planning and execution of developer-focused events and community initiatives on campus

Core Member, Google Developer Groups on Campus — UIC Chapter | 2024 – 2025

- Contributed to community building, workshops, and on-campus tech advocacy
